Hackers are looking to exploit network vulnerabilities

Don't leave the door open

A significant amount of cyber-attacks are due to poor patch management of software. According to the **Edgescan Vulnerability Stats Report 2019**, the average time to fix or mitigate a vulnerability discovered was 82 days (65 days for critical risk vulnerabilities) with the longest time being 198 days. Citadel Patching-as-a-Service alleviates the pain points of in-house Patch Management.

Patch Management

Challenges:

- Security pressure to patch quickly and correctly
- Limited patching tools
- Lack of resource
- Compliance pressures
- Budget restrictions
- More employees working remotely
- Manual processes are hard to sustain as the organisation grows
- Endpoints are increasingly becoming the weakest link in IT security, and the target of more sophisticated attacks

Patching-as-a-Service
Safeguard Business
Critical Services

Key Features

- Reduce the risk that unpatched devices pose to your business
- ITIL Service Desk
- Scalable, adaptable cloudbased patching-as-a-service
- Comprehensive reporting
- Keep pace with the constant stream of security fixes & maintain compliance
- Increase effectiveness of patching while mitigating skills shortages
- Reduce security risk by streamlining remediation cycles from weeks to minutes or hours
- Patch Status Monitoring of Server and Endpoint Operating systems

Simplify & Automate Patching-as-a-Service

Citadel Patching-as-a-Service allows businesses to reduce operational costs, proactively reduce security risks whilst enabling you to quickly enforce policies and report on compliance for audit readiness; providing the ability to make informed decisions knowing what patches were deployed and when, who were they deployed by and to what endpoints.

Citadel Patching-as-a-Service allows businesses to gain real-time visibility and reduce patch cycle times with controlled or managed automated updates, ensuring your business has the most up-to-date protection against cyber-attacks keeping your endpoints secure at all times.

CELERITY

Celerity, working in partnership with NCSC, regional cyber protection units & certified industry specialists to fight the war on cyber-crime.
