**DIGITISE  
YOUR  
PHYSICAL  
DATA**

Enhance Quality - Save Time - Reduce Costs

powered  
by *demarq*

## THE PROBLEM

---

The amount of physical documentation that exists within your organisation is likely to be a continued source of frustration, risk, inefficiency, and unnecessary cost to your business.

The ability to search documents for key words, quickly locate the information needed, assess the quality of the data, and ultimately find the value is fundamental to your ability to do your job efficiently and effectively.

Physical or scanned documents prevent you achieving this or at best slow the process down.

Maybe you have tried using software to help before, maybe it's been too expensive or difficult to implement. Maybe you haven't found a tool with the right functionality or maybe the tools you have worked with are just too clunky and ineffective.

There is a better way and it's easier than you might think....

## THE SOLUTION

---

Demarq-Oscar provides you with a cloud based data transformation solution, quick to implement and easy to use.

The solution has been developed with the user in mind. The complex functionality available within Demarq-Oscar is presented via an attractive and user-friendly front-end.

The responsive UI drives deep learning AI processing that rapidly extracts and arranges raw data from scanned documents.

The ability to search and index your imported data optimises your workflow and increases your productivity by allowing you to quickly find the information or documents you are looking for.

In-built Data Quality routines and automated identification of table columns and rows are just some of the functions that ensure Demarq-Oscar will greatly increase your efficiency, reduce the risk of human error and, quite simply, save you time and money.

The result is a quality assured, digital version of your data in seconds, rather than hours

## THE BENEFITS

01

### Reduces Costs

Cost savings can be widespread. Automation of data quality and data transformation processes remove the need for human intervention, greatly speeding up the process of ingesting and quality assessing the data. Storage costs are reduced as documents are moved to electronic storage.

02

### Lowens Risk

The risk of human error is reduced as data entry tasks are automated and quality checks are implemented increasing the confidence in your data. Documentation is stored electronically improving the likelihood of recovery in the event of a disaster and reducing the risk of a data breach.

03

### Improves Productivity

Demarq-Oscar allows you to quickly search and identify documents for analysis. Categorisation of documents at scale allows large volumes of documents to be rapidly digitised, categorised and formatted for quick retrieval. Automation of data transformation and quality checks greatly reduce time spent on menial tasks.

04

### Delivers Insights

Extract, combine and analyse previously inaccessible data from a multitude of sources with the potential of unveiling a wealth of additional insights and value for your business.

05

### Enhances Data Quality

Automated data quality checks and confidence scores provide feedback to the user and assist with continuous improvement to the quality of your data ensuring a higher confidence in your insights and results.

06

### Increases Security

Documents are transferred to digital storage making them more secure and manageable. Access is more easily controlled reducing the risk of data breaches and increasing the ability to be GDPR compliant.

## CONTACT US

---

Demarq values collaboration and practitioner led development.

We build our solutions with you in mind, working with our customers to enhance functionality and ensure our solutions deliver continuous value.

Contact us at [info@demarq.com](mailto:info@demarq.com) and we will be happy to answer any questions you might have

**FAST**
